

**Alice**

**Bob**

**Common paint**

$$p = 23, g = 5$$

$$a = 6$$

**Secret colours**

$$b = 15$$

$$A = g^a \bmod p$$
$$A = 5^6 \bmod 23 = 8$$

**Public transport**

$$B = g^b \bmod p$$
$$B = 5^{15} \bmod 23 = 19$$

+

=

**Common secret**

$$s = B^a \bmod 23$$
$$s = 19^6 \bmod 23 = 2$$

(assume that  
mixture separation is  
expensive)

+

=

$$s = A^b \bmod 23$$
$$s = 8^{15} \bmod 23 = 2$$
